THIS LINE WANTS GRAVEL HIGHWAY

WAINWRIGHT IS WORKING
HARD FOR HIGHWAYS

Asks Provincial Government to
Gravel to Boundary

The provincial government is being asked by the Wainwright board of trade to complete the main highway from Tofield to the Saskatchewan boundary at an early date, according to news received from W. A. Knowles secretary of the Wainwright Board of Trade.

At a recent meeting in Wainwright members discussed the advisability of approaching the government with a view to having an all-weather highway completed between the points named. It was stated that this road, if completed, would permit of better accessibility to the district for business purposes, and would also meet the demands of tourists to the Dominion government buffalo park, and also oilfield traffic.

For Relief Work

The question as to whether part of the federal government appropriation for the benefit of tourists traveling to the Dominion government buffalo park and also oilfield traffic, be requested to complete the main highway from Tofield to the Saskatchewan boundary at an early date and that part of the Dominion government appropriation be apportioned for the above purpose.

This resolution has been placed in the hands of Premier Brownlee, Hon. O. L. McPherson, Hon. R. G. Reid and J. R. Love, M.L.A., in order that the matter may receive their attention.

Following is the resolution:

"That, whereas this district is in great need of an all-weather highway to meet the ordinary business requirements of the territory, also for the benefit of tourists traveling to the Dominion government buffalo park and also oilfield traffic, be requested to complete the main highway from Tofield to the Saskatchewan boundary at an early date and that part of the Dominion government appropriation be apportioned for the above purpose."

This resolution has been placed in the hands of Premier Brownlee, Hon. O. L. McPherson, Hon. R. G. Reid and J. R. Love, M.L.A., in order that the matter may receive their attention.

FOOL CUTS INITIAL PAYMENT DOWN TO 55c

Winnipeg, Man., October 15th—Initial payment on wheat has been cut from 60 cents per bushel to 55 cents according to an announcement today by the Canadian Wheat Pool.

Fifty-five cents is to be the payment on No. 1 Northern, basis Fort William, effective today, until further notice.

No statement accompanied the announcement, officials of the Central Selling Agency remarking that no comment was required when the market prices on completely demoralized world markets were so close to the pool's initial payment.

MUNICIPAL DISTRICT OF
BATTLE RIVER No. 423

Notice is hereby given that, under the provisions of The Tax Recovery Act, 1929, the Municipal District of Battle River No. 423 will offer for sale, by public auction, at the Municipal office at Irma, Alberta, on Thursday the 18th day of November, 1930, at 2 p.m., the following lands:

Section	Tw.	Range	Mer.
Frac. of N. E. 36	44	7	4
S. W. 4	45	7	4
S. Half of N. W. 4	45	7	4
N. W. 30	46	9	4
N. E. 34	46	9	4
S. E. 25	46	7	4
N. W. 25	46	7	4

The above lands will be offered for sale subject to a reserve bid, and reservations contained in the existing certificates of title. Terms: Cash unless otherwise arranged. Redemption may be affected by the payment of the arrears of taxes and costs at any time prior to sale.

Dated at Irma, Alberta, this 4th day of September, 1930.

R. J. TATE, Sec.-Treas.

WEEKLY REVIEW PROV. MARKETS

Markets as Revised by the Market
Examiner, of Calgary,
For This Paper.

BEER—Edmonton reports trading during the past week has been quite active, especially for the light handy weight cows and heifers. Prices show little change from last week. Choice heavy steers made \$5.25@5.50; choice light \$5.25@5.50; good from \$5@5.25; medium \$4.25@4.75; common \$3.50@4.

FEEDERS, STOCKERS—A moderately active demand is prevailing in this market, and offerings turn over readily. Prices hold steady. Feeder steers \$4.40@4.75; stock steers \$3.50@4.50; stock heifers \$3.50@4.50; stock cows at \$2.50@3.75.

HOGS—Edmonton reports that the market during this week has been \$10.75 for bacon; select \$11.25, and the butchers at \$10.40, fed and watered basis.

SHEEP—A stronger tone noted on Edmonton market this week. Prices firmer. Yearlings \$4.50@5; ewes \$2@2.40, with lamb offerings bringing \$6@7.25.

CREAM—Receipts show slight decrease, but they are holding up very well as compared with last year; in fact reports indicate that they are heavier now than during the corresponding period of 1929. Prices are steady. Special, 27@29; first, 25@27; and second, 22@24c.

POULTRY—Prices steady, but under tone of market. easier. No. 1 fowl, over 4 lbs., 10c; No. 1, under 4 lbs., 8c; No. 2, 5c; roasters, 5c, and chicken, 12@14c.

EGGS—Extras 26@27c; first, 24@25c; seconds, 20@21c.

HIDES—Market continues very weak. Receipts from country points show a decline to low quotations. Prices are unchanged.

WOOL—Practically nothing is being handled. Fibbers quoting 7@8c per lb.

GOVT CONSIDERS
FARM RELIEF SAYS
HON. E. B. RYCKMAN

"Relief for farmers, probably in the form of bounties, will be given most grave consideration by the federal government," stated Hon. E. B. Ryckman, minister of national revenue and acting minister of finance, when interviewed on Wednesday morning.

"I find," said the minister, who arrived in Edmonton Tuesday night, "now that it is realized that a certain measure of protection is necessary in the interests of industry, that the farmers consider that if any protection is given to industry, they are entitled to similar assistance, no matter how difficult it may be. The request comes for bounties to aid the farmer."

Need Recognized

"The government full recognizes the necessities of the farmer, and the difficult circumstances in which he finds himself through no fault of his own. It is exceedingly sympathetic, and will give the matter every consideration and it is hoped that the government may be able to do something to ease the situation."

The Saturday evening dances are again being run every Saturday evening from 9 to 12 in Kiefer's Hall, Irma. Admission: Gents 55c, Ladies free.

WANT ADS

FOR SALE—One Good Grade Herford Bull, yearling. Write Box 864 or Phone 806, Irma. Mrs. O.L. Chase.

Irma Talkies

"The Light of the Western Stars" will rope the audience heart and soul with its spectacular outdoor scenes, its heart-thrilling romance, its rollicking humor and its great human thrills. It's Zane Grey as he has never been seen on the screen before—now his he-man heroes talk.

"The Light of the Western Stars" in novel form was one of the best sellers of the year. Paramount has captured the true spirit of the moving story. Kiefer's Theatre, Irma, Wednesday, October 22nd at 8.30 p.m. Adults 45c. There was no show last week on account of the very bad storm.

Adults 45c. 8.30 P.M.

CHURCH NOTICES AND ACTIVITIES

Sabbath Day Finds the Community
Joining in Observance, Prayer,
and Church Attendance.

UNITED CHURCH NOTES

The services next Sunday will be at Albert, Alma, and Irma, at the usual hours. The topic of the Sermon: "The Reward of the Faithful Few."

The Mission Band under the direction of Mrs. J. R. Geeson gave the congregation a treat in the shape of a play entitled "Just Suppose" on Friday, Oct. 10th. The children, nine over 12 years of age, took their parts remarkably well. The play, though short, with one main act and four episodes held the attention of the audience. The variety program which preceded the play was well received. It was comprised of songs, recitations and a Mother Goose Mission Play for the little tots. In the preparation of such a program, much depended on the mothers and its success was insured by their hearty co-operation. This special effort was to raise a contribution to the Mission work of the Church. The amount raised was eleven dollars, in voluntary contributions. Others taking part were, Mrs. Albert Knudson (accompanied by Mrs. Bert Long) and Miss Price. The Mission Band feels encouraged with the results of their effort and look forward to a good year.

Play characters:
American Mother, E. Geeson; Her daughter Dorothy, D. Geeson; Her daughter Mary Louise, G. Geeson; Her son Tom, C. Carter; Hindu Mother, M. Hill; Hindu Aunt, E. Tate; Hindu Woman, R. Sharkey; Hindu Woman, M. Tate; Hindu Woman, R. Woods.

ANGELICAN CHURCH

Service on Sunday next, October 19th in Irma United Church at 3 p.m. Everybody welcome.

Next W. A. meeting will be held on Tuesday, October 28th at the home of Mrs. Carter (north of town) at 2.30 p.m. Every lady welcome.

The W. A. are holding their Whist Drive on Thursday, November 6th in the lodge room. Lunch served, prizes given. Adults 50c. There will be a few articles of fancy work sold at this drive.

ST THERESA CATHOLIC CHURCH
IRMA, ALBERTA

Service on the first Sunday of each month at 11 a.m.

SILVER LANE NEWS

Threshing is going by fits and starts around here. There are some nice crops hereabouts and plenty of rigs to thresh it out, and also lots of help, but the weather man has only been allowing about two days a week for threshing.

The Smith Bros. are giving good satisfaction with their machine and crew of 5 bundle haulers and a mouse catcher, who is rather hard on good handles. Why not try a piece of gas pipe Bill? I think Tom could get 'em just the same.

Attitudes Of Mind

It is reported in a daily newspaper that some doubt existing as to which side of the international boundary line between Canada and Maine a certain old lady's farm was located, surveyors were employed and the decision finally reached that it was on the United States side. "I'm so glad!" exclaimed the old lady. "Canadian writers are so accurate."

Travelling from the United States to Canada on one occasion, the writer overheard a passenger remark just after the train had entered Canada: "The air is so much sweeter and purer now that we are back in Canada."

Climate to these people was an attitude of mind, but, nevertheless, very real. It leads one, however, to wonder whether many people do not approach many of their daily activities, not on a basis of actualities, but from some purely mental reaction.

On the day following the general election of July 28 last, a merchant in one of our Saskatchewan cities, a strong Conservative by the way, declared that his business had already greatly improved. He overlooked the fact that two fairly large conventions then in session in the city might have added somewhat to his day's sales. No, it was an attitude of mind with him—business had improved over night because the Conservatives had won the election.

It is the same with many in respect to hard times. Some people whose salaries, or wages, or other sources of income are the same now as they were in the boom days, or even greater, but whose cost of living is much less, due to lower commodity prices, "feel" harder up than many who actually suffer, they become terribly pessimistic and continually harp on the blue ruin aspect of things and how difficult they are finding it to make ends meet.

Without in the least discounting actual conditions, it is safe to say that with many people hard times is an attitude of mind, superinduced, maybe, by fear of the real thing; rather than the thing itself. Unfortunately there are many who are faced with truly hard times and have concrete problems to solve and difficulties to overcome, but there is a multitude of others who are no worse off today than they ever were but who "think" they are. They are largely responsible for cultivating and disseminating ideas that conditions are much worse than is actually the case.

The influence of mind over matter is a well authenticated and recognized fact. Records in doctors' offices contain scores and hundreds of cases of people who, having thought the matter with them, imagined there was something wrong and by constantly and morbidly dwelling on their imagined ills actually did become chronic invalids.

There is, too, that state of mind wherein people develop suspicions of others without any cause or evidence to support such suspicions, but having become suspicious of another, every word and act of such person, however simple and innocent, only serves to confirm and intensify the suspicions of the former.

Such attitudes of mind are to be deplored, and their cultivation to be guarded against by every individual. The harm done through constant thinking of unpleasant and evil things, and the breeding of thoughts of suspicion of others, or even of weaknesses in one's self, is almost incalculable. It spreads like a miasma through society polluting the life of whole communities.

Fortunately, the reverse of this is also true. The cultivation of clean, kindly and noble thoughts, the development of feelings of confidence in and goodwill towards one's neighbors, creation of the habit of looking at the bright rather than the dark side of things, also spreads through society and uplifts and brightens the lives of all persons with whom such a sane and happy individual comes in contact.

Jamaica Buys From Canada

Is Grateful For Tariff Preference On Fruits and Vegetables

Canada is getting all kinds of business that formerly went to the United States because of Jamaica's gratitude to Canada for recent tariff preferences, according to L. T. Kennedy, prominent business man of Kingston, Jamaica, who was a recent visitor in Montreal.

"We in Jamaica are very grateful to Canada for her preference in fruits and vegetables, and as a result, millions of dollars worth of business which formerly went to the United States is now being diverted to Canada. We buy a great deal of fruit from you, among other things," he said.

New Building For C.N. Exhibition

Another permanent building is to be erected for the Canadian National Exhibition, Toronto, at a cost of \$1,000,000. The buildings already erected in exhibition park are valued at over \$20,000,000. The new building will be used for exhibiting horses and cattle.

"Mrs. Smith," said the minister, "does your husband confide his business trouble to you?"

"Yes, indeed he does," said Mrs. Smith—"every blessed time I buy anything."

A woman may be clever enough to do any work a man can do but the cleverest gets some man to do it for her.

ULCERS, BAD LEGS OLD WOUNDS & SORES

Marvellously Healed by Zam-Buk.

Ointment 50c—Medicinal Soap 25c.

Wealthy For A Day

Girl Student From Copenhagen Enjoys Herself In Berlin

Miss Malinen Boring, a student of medicine from Copenhagen, Denmark, experienced her first millionaire for a day in Berlin. She had won first prize in a contest, sponsored by the Danish daily, "Politiken," which meant that she was permitted to spend one day in Berlin with all bills, no matter how high, paid by the paper.

There was one condition, however, Miss Boring was not allowed to acquire anything which might be of value to her after her role of millionaire expired.

She therefore found the task of spending money somewhat difficult. A visit to Prof. Albert Einstein, an airplane spin, a drive about town in a costly limousine, sumptuous meals at the most expensive Berlin restaurants and attendance at a theatre comprised her day's "extravagances."

Pale People Are In Peril

Some Form Of Nervous Breakdown Always Threatens Them

Pale people are almost always nervous. Pale skin denotes lack of blood and too little blood usually results in faded nerves, sleeplessness, headache or neuritis.

Dr. Williams' Pink Pills are different from most other medicines—it is impossible to take them and not feel better. Their whole mission is to make rich, red blood. This new blood strengthens the nerves and gives vitality to the whole body. Concerning them Mrs. G. Cook, Bloomer Street, Toronto, says: "Two years ago I used Dr. Williams' Pink Pills for a nervous breakdown with the result that I have been well and strong ever since." You can get these Pills from any dealer in medicine or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Canada Playing Valuable Part

Vancover Expert Will Lay Rails For Bermuda's First Railway

Canada will play a valuable part in the construction of Bermuda's first railway, which is hoped will be completed within a year or so. Louis McDonald, of Vancouver, expert in road beds and track laying, has gone to Bermuda aboard the C.N. steamer "Lady Somers," after engaging ten men in Montreal to follow him later to Bermuda. The Vancouver expert has been 35 years in the business of rail laying. He served under General J. W. Stewart in the 12th railway troops during the world war and is now working with Balfour, Beatty and Co., London, England, builders of the new railroad.

If Miller's Worm Powders needed the support of testimonials they could be got from mothers who know the great virtue of this excellent medicine. But the powders will speak for themselves and in such a way that there can be no question of them. They act speedily and thoroughly, and the child to whom they are given will show improvement from the first dose.

Permits Are Cancelled

Foot and Mouth Disease Bars Imports From Britain

Owing to the existence of foot and mouth disease in England an order has issued from the Department of Agriculture at Ottawa under the Animal Contagious Diseases Act cancelling all permits for the importation of ruminants and swine from Great Britain to Canada. This action has been made necessary as foot and mouth disease has been confirmed near Leeds in England. The order reads in part:—"Owing to the presence of foot and mouth disease in England all permits for the importation into Canada of cattle, sheep, goats, other ruminants, and swine from Great Britain are cancelled, with the exception of those covering shipments which are at this date actually embarked on vessels en route to Canada." The order was dated September 8, 1930.

As a vermifuge an effective preparation is Mother Graves' Worm Expeller, and it can be given to the most delicate child without fear of injury to the constitution.

Newest In Machines

To learn what and how much you need, simply drop a coin in a new slot machine, which was shown at the International Hygiene exhibition at Dresden, Germany. The machine weighs you, measures your height and then delivers a card outlining your diet, showing the nature of the food and the number of calories you should consume daily.

Americans spend approximately \$1,000,000 a day for ice cream.

Minard's Liniment has a hundred uses.

DON'T SUFFER WITH DANGEROUS INDIGESTION

Do you suffer after meals with a belching from gas and acid stomach? Many believe they have heart trouble and tremble with fear, expecting any minute to drop dead. This condition can be prevented, likewise relieved. Take Carter's Little Liver Pills after meals and neutralize the gases. Sweeten the sour and acid stomach, relieve the gas and encourage digestion. The stomach, liver and bowels will be cleansed of poison, painful and dangerous indigestion disappears and the system enjoys a tonic effect. Don't delay. Ask your druggist for a 25c box of Carter's Little Liver Pills.

An Interesting Discovery

Iron Foundry In Northern Rhodesia Thousands Of Years Old

Entirely new light will be thrown on the history of metallurgy by the discovery of an enormous iron foundry 3,000 or 4,000 years old, at Mumbwa, Northern Rhodesia. Three different races appear to have used this foundry. The last race was an intelligent people, who knew how to choose stones, mix them in the right proportion with bone and quartz, place them in curiously-constructed moulds, in which they would subject them to a torrid heat, pour in molten lead from the furnace, and so fashion wonderful cutting and piercing implements.

Recipes For This Week

(By Betty Barclay)

GREEN TOMATO AND ONION PICKLE

- 1 pk. green tomatoes.
- 1 sliced onion.
- 1 tablespoon black pepper.
- 2 tablespoons white allspice.
- 4 tablespoons dry mustard.
- 2 tablespoons mustard seed.
- 1/2 cup sugar.
- 4 cups vinegar.

Slice the green tomatoes. Put a layer in the kettle, then a layer of sliced onions. Sprinkle with salt. Then add another layer of green tomatoes, and so on. Let stand overnight. The next morning drain off the liquid, put into preserving kettle with all the other ingredients, and simmer gently 30 minutes. Fill glass jars and when cold put in cool, dry place.

PENNSYLVANIA CHILI SAUCE

- 24 medium-sized ripe tomatoes.
- 8 large onions.
- 3 green peppers.
- 3 red peppers.
- 1 cup sugar.
- 4 tablespoons salt.
- 5 cups cider vinegar.
- 1 tablespoon nutmeg.
- 1 tablespoon ground cinnamon.
- 1 teaspoon ground cloves.
- 1 teaspoon allspice.

Cut tomatoes in small pieces. Grind onions and peppers through food grinder. Mix all ingredients and boil over moderate heat until sauce attains the desired consistency. Then jar immediately.

Women and Asthma. Women are numbered among the sufferers from asthma by the countless thousands. In every climate they will be found, helpless in the grip of this relentless disease unless they have availed themselves of the proper remedy. Dr. J. D. Kellogg's Asthma Remedy has brought new hope and life to many such. Testimonials, sent entirely without solicitation, show the enormous benefit it has wrought among women everywhere.

Parachute For Plane

A parachute for an aeroplane, designed by Dr. J. T. Parr, a dentist of Oakland, California, is released by pressing a control lever. This opens a trap-door in the upper wing and the parachute is shot out. The chute swings the plane and pilot slowly to earth, and has a landing speed of about 15 miles an hour.

His Nightly Message

This often repeated nightly message which his chauffeur delivered to Sir J. Bickerstaffe as to the latter's funny old wig, fire's dying out, the water is nice and hot, the windows and doors are bolted; the mouse traps are set and there are no mice. Good-night, Sir John."

Against Grippe

Meet Hardships In North

Man and Wife Blazing Trail Had To Live On Moose Meat

A three-months' silence since a daring couple plunged into the trackless wilderness of Northern British Columbia, bound for Alaska on foot, has been broken by word from William Albee to his parents at Glendale, California, telling of the successful adventure of the young man and his wife.

A short letter, scribbled on a sheet of ledger paper and borne in a brown, weather-beaten envelope, delivered to the home of Mr. and Mrs. E. P. Albee, recounted a valiant struggle against a series of hardships. The letter was mailed September 17, from Telegraph Creek, British Columbia.

Leaving Fort George, British Columbia, in the middle of June, Albee, 24 years old, and his wife, 22, cut a path toward Liard Post, far to the north.

Albee carried an 82-pound pack, his wife a 52-pound pack, and a dog was loaded with 30 pounds. They hoped to make Liard Post in four weeks. "Instead," Albee wrote, "it took nine weeks." Five weeks out of Fort George, their provisions gave out. "We lived the remainder of the journey on moose meat—three times a day," he added.

Albee said what maps they had apparently were in error for they never found any landmarks. They will spend the winter in Dawson. The young man's parents said the couple probably will cross Alaska next summer and they might plan to continue across Bering Strait to Siberia and around the world.

Minard's Liniment For Chest Congestion.

Recent photographs of the planets add evidence to the belief that Mars, Jupiter, and Venus have an atmosphere, as the earth has.

AFTER EVERY MEAL

A Gesture Of Friendship

McGill University To Receive Fountain From United States

A gesture indicative of the friendship of the United States toward Canada will soon be made at Montreal, when a marble fountain designed by Gertrude V. Whitney, will be presented to McGill University by an United States committee of goodwill to Canada.

Dr. John H. Finley, of the New York Times, and a member of the United States committee, will make the presentation address, and His Excellency Lord Willington, Governor-General, will, in turn, present the fountain to the university through its chancellor, E. W. Beatty and its principal and vice-chancellor, Sir Arthur Currie.

A London bookseller has collected more than 400 editions of "Robinson Crusoe" in all languages.

Canadian Aviation History Is Made When Bird Men Travel 20,000 Miles Over Arctic Area

When two seaplanes soared down to a safe landing on the Ottawa River recently, it marked the end of possibly the most outstanding flight in Canadian aviation history. For the past two months the planes had traversed the frozen wastes of the far north. In that time, they travelled 20,000 miles, mapped a small empire of virgin territory and made meteorological and topographical surveys of many parts of Canada's hinterland.

Yet it was all in the day's work for the men who made the trip. With a mere shrug of the shoulder and the terse comment, "Why, it was nothing," they who had written such an important chapter in Canadian exploration and aviation history, dismissed the whole matter. Flight-Lieut. P. J. Mawdsley was in charge of the detachment and piloted one of the machines. Flight-Sergeant H. J. Wherry handled the other plane, representing the survey and photographic work was in charge of C. S. Macdonald, of the Department of the Interior, an experienced Arctic traveller. Sergeant S. C. Deaury was the mechanic and camera operator.

The trip took the two planes as far west as Alaskan, on the Mackenzie River, and as far east as Repulse Bay, an inlet on the extreme northern portion of Hudson Bay. Chesterfield Inlet and Churchill were two of the intermediate points touched which are familiar. A total of 2,500 photographs were taken, representing thousands of square miles of territory never before mapped or surveyed. In addition to this work, the caches of gasoline and oil, maintained in this mechanized age for exploration work in the north, were inspected. Suitable air routes were mapped and the river bottoms charted. This latter work was undertaken to determine, if possible, the economic possibilities of the country.

The party made numerous tests of aeronautical equipment and, among other things, discovered a device for counteracting the effects of the magnetic pole. Previously it had been reported that the proximity of the magnetic pole influenced the compass needle, making it sluggish and, in some instances, utterly destroying its usefulness. Equipped with a Canadian periodic compass, neither plane experienced any difficulty in navigating within the pole region.

Mink Shipped From Yukon

Five Hundred Sent To Sweden and United States Points

Five hundred dark, dumpy, little minks pressed enthusiastically against strong wire bars, and five hundred little munks screeching crying disgust at being caged, signified the arrival at Vancouver of the steamship "Princess Louise" from Alaska, with the largest shipment of mink to ever pass through British Columbia. Raised in captivity by George Simmons, of Carcross, Yukon Territory, the fur-bearers were en route to Gathenby, Sweden, with a few for United States points, where they will either serve midday's wardrobe or be distributed for the nucleus of mink farms in and around those territories.

Dairy Cattle Capture Prize

Eighteen Head From C.P.R. Strathmore Farms Win Awards At Spokane

Eighteen head of dairy cattle from the Canadian Pacific Supply Farm at Strathmore, carried off sixteen firsts and ten second prizes as well as all the championship ribbons at the Washington Inter-State Livestock Exhibition at Spokane recently, according to E. Ward Jones, superintendent of the railway's department of agriculture and animal industry. Included in the awards won by the Strathmore herd were the male and female grand championships, senior and junior female championships and the junior male championship.

Although tea was grown in China as early as the sixth century, it was not heard of in Europe for another thousand years.

Automobile Export Business

New Zealand Canada's Best Overseas Market In 1929

New Zealand was Canada's best overseas market for automobiles in 1929, according to a return issued by the Dominion Bureau of Statistics. The two Antipodean dominions, New Zealand and Australia, accounted for nearly 33 per cent. of Canada's export business in this industry. To New Zealand this country exported automobiles amounting in value to \$5,629,060, while Australia took cars valued in the aggregate at \$3,593,273.

Second to New Zealand was the United Kingdom, which purchased \$4,289,182 worth of automobiles, while British South Africa bought automobiles with a value of \$2,792,180. Thus, of a total export trade of \$29,824,433 the United Kingdom and the three other dominions accounted for considerably more than 50 per cent.

Of the foreign countries the Argentine republic was Canada's best customer, purchasing \$3,905,085 worth of automobiles.

Automobile production in Canada during 1929 reached the figure of \$177,315,693, as compared with \$162,807,495 in the preceding year, and \$128,700,514 in 1927.

(By Eva A. Tingey).

SCHOOLGIRL CHIC

All Tingey models are created and sketched in Paris and the patterns are made in New York.

For wear in school here is a charming style. If, however, it is not school wear which is required other materials will render the model suitable for various occasions. For instance for afternoon velvet would be a most attractive material, with white or some other contrast against the frock for collar and cuffs. For very smart wear a velvet collar and cuffs of metal tissue can be worn.

With woollens and washing materials like challis or gingham, collar and cuffs can be of pique, linen or washing silk according to the type of the frock. If the dress is developed in crepe-de-chine or taffeta, lace for the collar and cuffs is charming and a rather wider, self wash instead of the belt to knot at the back.

This pattern may be obtained in sizes 8 to 14. It is ready for immediate delivery. It is hand cut.

Sent 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Shipment Under Empire Marketing Board Scheme

British Columbia Receives Consignment Of Pure Bred Livestock

The B.C. Provincial Department of Agriculture received word recently from Agent-General F. A. Pauline in London, England, that the first shipment of pure bred live stock to be shipped to British Columbia under the Empire Marketing Board scheme via the Panama Canal had left the Old Country for Vancouver. The shipment consisted of 23 rams and ewes for breeders on Vancouver Island and the lower mainland, and a Red Poll Bull for H. E. Waby, of Enderby, president of the Canadian Red Poll Breeders' Association. The Dominion Government has established a quarantine station for live stock at Vancouver, which was ready when the shipment arrived at the end of September.

Special interest attaches to a part of this shipment of sheep as it comprises the first group of Kerry Hill sheep ever to come to Canada. These animals have been brought out as an experiment by Chas. Eccleston, Victoria, and come from the flocks on Lord Rarichen's Brognynt estate at Osewstry, Shropshire, England. His brother, Bert Eccleston, is shepherd there, but formerly resided in E.C., and believes that these sheep will stand the Canadian climate well.

Extraction May Be Costly

Germans Find Extracting Beryllium From Beryl Hardly Pays

Canadian technical experts professed themselves as being unaware of any special report for the Imperial conference on the beryl deposits near Winnipeg in Manitoba. On behalf of the mines branch of the Canadian government there had been inquiries into the possibilities of extraction of beryllium—which is used in light metal alloys—from the Manitoba beryl. It was stated.

Experiments by a German concern, however, had tended to show the cost of extraction of beryllium from beryl was very high in comparison with the result obtained and the Germans were now turning to lithium for light alloy, it was pointed out. The Canadian officials are watching the German experiments closely, for lithium occurs in greater frequency in Manitoba than does beryl.

Real Drive Against Weeds

The so-called thistle, twill grass and other troublesome weeds, the roots of which have been turned to the full strength of the sun, will have no vitality left to reestablish them another year. More early ploughing or sod and after harvest cultivation than usual have been accomplished this year. Even without a word from the weed inspector, farmers are making a real drive against weeds. Farmers' Advocate.

Wheat Situation Sound

Canada's wheat situation, both as to marketing and prospective price, and also as to the wheat-growing future, fundamentally is such as to discourage pessimism. That is the verdict of B. P. Alley, assistant general manager of the Canadian bank's flour. Bank of Commerce, in charge of the bank's business in Western Canada.

Although the water in the Arctic and Antarctic oceans is salty, the ice that forms is free from salinity.

Appendicitis caused more than 18,000 deaths in the United States in 1928.

THREE RECORD BREAKERS

Three heifers that have made dairymen's history in Alberta are shown above. They are right to left: Mona Pontiac Walker, Rose Echo Warwick and Laura Fremont, and between them they produced 77,460 pounds of milk and 2,902 pounds of butter in the year, respectively, to last June, last May and last April. This averages out to 25,820 pounds of milk which beats the highest record made by a four-year-old in Canada in 1929 by 2,000 pounds, while the average dairy cow in Alberta produces less than 4,000 pounds. They are the property of the Canadian Pacific Railway at the company's experimental farm at Strathmore. The first two are four-year-olds, and the last is a

Sodium Sulphate Plant

Important Industry Is Established In Southern Saskatchewan

A visit to the sodium sulphate plant at Horse Shoe Lake at Ormiston, Sask., along the Amulet branch of the C.P.R., gives a fine indication of the progress that is being made and the prospects for the future success of this valuable provincial resource, according to a statement issued by the Saskatchewan Provincial Bureau of Publications.

Horse Shoe Lake contains millions of tons of sodium sulphate, and already a considerable start has been made on its utilization, the statement continues.

The plant which is operated by the Horse Shoe Mining Company, Limited, is a very extensive one and the investment of several hundred thousand dollars. It is owned jointly by the Eschum Reduction Company of Charleston, West Virginia, which holds a majority of the stock, and the International Nickel Company of Canada.

This company has successfully solved the problem of dehydrating the live which seems to have been the difficulty in the past in the way of utilizing these deposits. Saskatchewan possesses most of the world's supply of sodium sulphate in its natural condition, and there are indications that it is likely to find a large and growing market.

In the past it has been regarded as the most valuable digestant in the manufacture of paper from pulp. Owing, however, to the difficulty of obtaining supplies in volume, many of the pulp plants in Eastern Canada have been using a process known as the "sulphite" process. The mills, however, that manufacture kraft paper must have sodium sulphate, and in the past have been supplied by a synthetic product made from the by-product of sulphuric acid, in the chemical centres of the United States, which has been coming into Canada duty free. Sodium sulphate is also used in textile manufacture, the making of leaded glass, photographic supplies, dye establishment, and many other things, besides being the basis for many veterinary remedies. It is found in the pure condition, and in vast tonnage in the southern portion of Saskatchewan.

This company which has a payroll of approximately \$7,000 per month, and being situated in an area that has suffered severely from recent crop failures, is helping, according to the statement, to relieve the local situation, it at present preparing about 100 tons per day. Additional units are being installed to greatly increase this output. Already 150 cars of 45 tons each have been shipped to the International Nickel Company, and the output is so booked ahead that the Horse Shoe Company can take no outside orders.

Weather Ports Near Poles

An ambition to establish meteorological stations near both the north and south poles in the hope that information will be secured which will permit forecasting the seasons years in advance was revealed by Sir Hubert Wilkins, noted Arctic explorer in an address to the Canadian Geographical Society. Sir Hubert reviewed his polar exploration work during the past few years and told of plans for invading the Arctic in a submarine next summer.

Mr. Spinkles: "But why did you buy a dachshund for the children?"
Mr. Linker: "So they can all get him at once."

Wide Discrepancy Exists In Estimates of Amount of Russian Wheat Exported To Britain

Winter Feeding Of Bees

Entire Supply Is Given Them At One Time

One of the strangest things to the ordinary individual is that the feeding of bees for the winter differs from that of other live stock in that the bees are given their whole winter supply of food at one time, while other stock receive their rations day by day. Toward the end of September, the bees should receive sufficient food to tide them over the fall, the winter and the spring until the warm days come and they can gather nectar.

Some beekeepers feed their bees sugar syrup; others give them natural stores—honey. When natural stores are given the feeding method is usually employed. To get an idea of what the food chamber is, let us look at a hive and we will see that it is built up like a large building—storey by storey. The lower or ground storey is called the brood chamber and it is here that the queen reigns. The storeys above this are the ones in which the honey is placed by the bees.

As the first honey brought in at the beginning of the main flow is considered the best, and as the bees, which are sometimes confined to the hive without the chance of a cleansing flight for close on 22 weeks, may have the best, this honey is set aside for them. This storey or box full of honey is called the food chamber. Experimental Farms Note.

As He Saw It

Japanese Schoolboy's Essay On Bananas Was Not So Bad

Japanese descriptions are almost always good for a few laughs, says the Los Angeles Times. One of the latest is the theme of a little Japanese schoolboy in the Sacramento Valley. The subject was "The Banana," and the little fellow wrote: "The banana are great remarkable fruit. He are constructed in the same architectural style as the honorable sausage. Difference being skin of sausage are habitually consumed while it are not advisable to eat rapping of banana."

"Banana are held aloft to eat rapping; sausage are usually left in reclining position. Sausages depend for creation on human being or stuffing machine while banana are primitive product of honorable mother nature."

"In case of sausage both conclusions are attached to other sausages; honorable banana on other hand are joined on one end to the stem and opposite terminus are entirely loose. Finally banana are strictly member of vegetable kingdom while affiliation of sausage is often undecided."

Skin Milk For Heats

Tests Show It Gives Better Results Than Beef Scraps

In tests, carried on for five winter seasons, November to February inclusive, Barred Rocks receiving skimmed milk laid more eggs and gained more weight than the ones getting beef scrap reports G. A. Langelier, of Cap Rouge Experimental Station. On the basis of the experiment, beef scrap is worth nine times as much as skim-milk, weight for weight, so that at the usual valuation of skim-milk at 20 cents per 100 pounds, beef scrap would only be worth \$36 per ton.

That skim-milk may furnish all the protein required, 100 layers should get from 12 to 14 quarts per day," Mr. Langelier estimates. "If this can be spared for the poultry, care should be taken that it be given always sweet or always sour, to prevent digestive troubles, and that it does not freeze."

Twenty Hours To Go

A very tired man left a call with the telephone girl at one of midtown hotels at 4 o'clock Sunday morning to be called at 2 p.m., but instead of making it, explicit, he said:

"Please call me at 2 tomorrow afternoon," forgetting of course, that it was then 4 o'clock in the morning. He slept through fourteen hours and, dressing, went to the management to complain that the girl hadn't called him.

When the manager talked to the girl about it, she said:

"Why, he's got twenty hours to go yet!"

Soviet Russia is purchasing 100 carloads of combine harvesters.

Production of window glass has just been introduced into Mexico.

A wide discrepancy exists to estimates available in London, England, of the amount of Russian wheat exported to Great Britain this season.

In Liverpool, centre of the grain trade, it was stated that only 620,000 quarters or about 150,000 tons, all of fairly good quality, have been received at ports of the United Kingdom from Russia between Jan. 1 and Sept. 27.

Estimates of British traders and official observers in London, fixed the figure roughly at 450,000 tons for United Kingdom ports in July, August and September.

The difficulty of fixing figures of Russia's export wheat trade and of her export statistics from Great Britain because the Soviet government trading agencies are dealing independently with various grain concerns and there is no central place to obtain actual totals.

Russian officials here have no authority to discuss grain shipment figures, even if they were available. The problem of checking wheat exports is likely to be simplified soon. Arrangements are being made to keep a tally at Istanbul of all Russian grain shipments from the Black Sea, whence all substantial cargoes are shipped.

According to the figures available in London, heavy wheat shipments from Russia began in July. During that month 28,000 tons of wheat were estimated to have arrived in British ports. Heavy consignments began to arrive early in August, and during August and the first half of September grain cargoes from Russia amounted to 400,000 tons.

It is estimated that about 15,000 tons are on the way to United Kingdom ports and an additional 26,000 tons en route to continental Europe. Besides these, the believed to be in grain circles that nearly 100,000 tons, which already have been sold, now await shipment from Russia.

It is pointed out that Russia bought \$100,000,000 worth of goods from the United States last year and \$20,000,000 worth from Great Britain. These bills are falling due and must be met and the great stores on the shores of the Black Sea constitute the Soviet's most easily convertible assets.

Russia's domestic demands for wheat may not justify selling abroad. There is an idea in some quarters that decreases in other Russian exports, such as timber, may be forcing the Soviet Government to take a chance of selling foodstuffs which may be needed later. For example, as a part of the five-year programme of development, Russia originally planned to send 750,000 standards of timber to the British market. This figure is not actually expected to pass the 600,000 mark and the Soviet planners face this deficiency in some other exportable product.

Trade officials in London are watching the wheat situation closely. One opinion expressed was that a great deal of forcing down of prices and propaganda to force prices down has been done by traders and others who are opposed to the operation of the Canadian wheat pool, the United States farm board and the proposed Argentine wheat pool.

An idea of the amount of Russian wheat shipped during pre-war years can be had from the fact that between 1909 and 1913 some world wheat shipments were: Russia, 4,750,000 tons annually; the United States, 3,250,000, and Canada, 3,000,000 tons.

Early Canadian Shipbuilders

The first shipbuilding in Canada was done by Pont-Grave, who built two vessels at Port Royal (Annapolis Royal, Nova Scotia), in 1608, when he believed himself to have been deserted by DeMonts. It was Talon, however, who gave shipbuilding the status of an industry, for in 1665, before he returned to France, 350 men out of a total population of less than 7,000 were engaged in constructing wooden vessels.

The gent who tries to beat the "Limited" to the crossing is the one who puts the auto into autopsy.

"Influence, my boy, is what you think you have till you try to use it."

"Suppose we fell in the water now?"

"How dreadful! The lake would overflow its banks."—Hummel, Hamburg.

OFTEN BEEN WORSE

(The following, from the Boissevain "Recorder," is applicable to our own district. It contains a lot of truth. "Times" have been "hard" before—and grumbling about it never led to a way out. There's the other side of the sheet: No war is raging; we live in peace, and, if not in plenty, at least few bear any traces of actual want; if the earliest pioneers were alive today, and stepped into the average home in our district, would they recognise many signs of real "hard times"? Forish optimism may be "bunk"—but at that it is better for the troops than gloomy pessimism. There always has been a way out!)

"While present conditions are not as favorable as they have been for several years past, it cannot be denied but what in this district conditions have been worse time and again; in fact, the present outlook, fifteen or twenty years ago, would have been a very good one.

Undoubtedly there is, and has been a very great deal of unemployment throughout Canada for the past several months. This condition has been most noticeable in the larger cities, where considerable foreign element congregates. In rural towns and districts the unemployment has not, up to the present, been a very disturbing factor.

In districts where there has been a total crop failure or partial crop failure; hailed out areas; in districts where wheat is grading all the way from 3 Northern to feed, there is bound to be hard times.

Our district has been most fortunate this year as in past years, in producing a wheat crop that will average around 25 bushels per acre and a splendid sample, and while the price of grain is small, yet there is a great deal to be thankful for, and the farmers in this district should not in anywise be depressed, in fact, when compared with farmers in many other districts, they are, so to say, well away.

Depression is a disease, and the foundation of the disease is pessimism allowed to run wild. What we want is a little more optimism and we have every reason to be optimistic. We have one of the finest farming areas in Canada. Our indebtedness, town and municipal, is practically nothing when compared with assets. Our mortgage indebtedness in this district is not very large, so why all the worry.

In prosperous times there are too many quick-rich schemes, which unfortunately, in most instances, turn out to be the very opposite. If the money that has gone out of this district, in foolish ventures, was in circulation here at the present time, there would be very little pessimism.

We have a district second to none and while there may be setbacks from time to time, yet we will continue to make steady progress in the future as has been the case in the past."

THE TOLL OF THE AUTOMOBILE

Every day, picking up the newspapers, we read of automobile accidents resulting in loss of life or limb, and smashed cars. Statisticians have compiled figures, and from time to time published these to show the loss in lives, and in money. These losses have always been tremendous, and are on the increase. It is time something is done about this.

The question of safety simmers right down to the individual. If each one does his or her best, and keeps out of an accident, there would be no accidents any more. Next time you start out on a drive make up your mind to see that you return without a mishap. Check the mechanical points on your car. Brakes, lights, tires and so forth; and when driving, be alert and remember the old epiphany that has a moral in its humorous lines:

"Here lies the body of William Gray, Who died maintaining the right of way.

He was right, dead right as he sped along; But he's just as dead as if he'd been wrong.

The Canadian government, as a means of stopping unemployment in the Dominion, is going to build higher barriers against the importation of cheap foreign goods and the immigration of cheap foreign labor. In other words, Canada is showing good house sense.—Wausa, Nebraska, Gazette.

VIKING

J. J. Overbo and J. C. Shortell of Kinsella were business visitors in town on Tuesday.

The dance at the Diamond Willow school has been postponed until, October 31st.

Miss Burnham was a visitor to her home in Viking at the end of the week.—Camrose Canadian.

Miss Mary Anderson, daughter of Mr. and Mrs. A. D. Anderson, is a patient in the University Hospital, Edmonton.

There's a good "feed" in store for those who attend the Ladies Auxiliary dinner at the Church Hall next Saturday commencing at 5 p.m. The curling and skating rink is undergoing repairs. Judging by today's weather, the boys will soon be heaving the rocks down the old alley.

With a couple of days of sunshine the threshers were in hopes of starting the machines on Thursday of this week but a wet spell again on Tuesday of this week has put another crimp in harvesting operations.

Mrs. Ellen Bayhen of Viking, Alberta, was the holder of the lucky ticket which won for her the lovely quilt offered by Mrs. Frank Mohler, Camrose. The number of the ticket was 292.—Camrose Canadian.

A home talent play entitled "Turning the Trick" will be staged under the auspices of the local tennis club in the near future. The cast is now diligently rehearsing. Watch for the date in next week's paper.

Mr. and Mrs. Peter Knudson and Mr. and Mrs. John Knudson and three children arrived today from Prince Rupert. They intend to make an extended visit in this district.

Mr. and Mrs. J. G. Leford have returned from a three months visit to their old home in Norway. They left the old country to come to Canada about thirty years ago and this was their first visit to their old home. They found conditions greatly changed, but nevertheless the trip was greatly enjoyed.

INNISFREE NEWS

INNISFREE, Oct. 11.—The village is in the municipal district which has high standing in the community progress competition sponsored by the Canadian National Railways and also one of the healthiest in the province.

A banquet was tendered the visitors in the Alberta hotel and was attended by several business men of the town, among them being: Dr. M. C. Adamson, Mr. D. J. Dickson, Mr. C. M. Nelson, Mr. R. B. Hall, Mr. Chas. Johnson, B. F. Dickson, Fred Clarke, Edward Simpson, Claude Laws and Mr. Kulnatsky.

Mr. Street, proprietor of the Alberta hotel, is to be congratulated for the excellent dinner served to the guests.

Mrs. Gunn gave a splendid address to the pupils of the school.

The funeral of the late Mr. Hoff was held last Friday afternoon from the United Church, Rev. Mr. Millar conducted the service at the church, and the members of the Masonic Order took charge at the graveside.

Floral offerings were received from Mr. and Mrs. R. Gibbons, Mr. and Mrs. N. Stearns, Rural Credit Society and Matchett & Nelson.

Mr. Hoff leaves to mourn his loss, his wife, three daughters and two sons. Interment was made in the Innisfree cemetery.

Mr. Ed. Dove and family have moved into the house owned by J. Ruzsky of Mundare.

The Ladies Aid of the United Church will meet at the home of Mrs. B. F. Dickson next Thursday.

C. M. Nelson is a business visitor to the city this week.

Threshing continues intermittently on account of frequent showers.

The district meeting of Rebekah Lodge, district No. 4, I.O.O.F., will be held in the town of Vermilion on Wednesday, October 15th. Mrs. R. Street and Mrs. C. M. Nelson are representatives from Innisfree.

"ANALYZING A MAN

A local lady who has got tired of hearing the men brag about their importance looked up facts and found out just what a man is composed of and submits the following result of her investigation. A man is composed of:

Fat enough for seven bars of soap. Iron enough for a medium-sized nail.

Sugar enough to fill a shaker. Lime enough to white wash a chicken coop.

Phosphorous enough to make 2,200 match tips.

Magnesium enough for a dose of magnesia.

Potassium enough to explode a toy cannon.

Sulphur enough to rid a dog of fleas.

This whole collection is worth 98 cents, and that in a day when things are three times higher than they used to be.

WHEAT POOL NOTES FOR THIS WEEK

Eighty nine members joined the Alberta Wheat Pool during the first eight days of October. Contracts have been coming in to head office in a steady stream in spite of the fact that no active canvassing is being done. During the month of September 171 signed contracts were received by the Alberta Wheat Pool.

Deliveries of wheat to Pool elevators reached the high water mark on Monday, October 6th, when the day's receipts totalled over 800,000 bushels. The bulk of the receipts of grain by Pool elevators has been received from Southern Alberta as threshing has been delayed in the central and northern portions of the province.

The earlier threshed grain from the southern part of Alberta showed remarkably high protein according to tests made from many points. Samples from Hesketh and Teddesleigh showed a protein content of 19 per cent, while many other points supplied samples of wheat which tested from 15 to 18 per cent protein content.

The semi-annual meeting of the boards of directors of the three provincial pools of Western Canada will be held at Calgary, October 16th. These interprovincial meetings are held alternately in Winnipeg, Regina and Calgary.

The terminal elevator at Victoria, B.C., owned by the Panama Pacific Grain Company has been leased by the Alberta Wheat Pool. This terminal has a capacity of one million bushels. The Alberta Wheat Pool now has control of terminal storage of over nine million bushels on the Pacific coast.

The Wastebasket

"After all the country seems to be fundamentally sound," said a local citizen as he listened to the racket coming from the radios of his neighbors on all sides.

"Don't you think," asked a lady of a gentleman at a social occasion here, "that a husband should occasionally tell his wife that she is beautiful?" "No," he replied, "it would be wholly superfluous. If she is beautiful she knows she is, and if she isn't beautiful she thinks she is."

"Do you think I should give up working after I am married," asked a Bruce girl of her mother. "You might resign your position," the mother replied, "but you'll find that women don't give up working when they're married."

While a fellow was attending a dance at Jarow he noticed a girl sitting alone in the seat of an open car parked near the hall, and slipping alongside the car quietly before she was aware of his presence he kissed her. "How dare you?" she shrieked. "Pardon me," he bluffed, readily, "I thought you were my sister." She looked closer at him in the moonlight. "You silly fool," she giggled, "I am."

Heard on the street in a neighboring town: "What profession does he follow?"

"The medical."

"So he's a doctor, eh?"

"No, an undertaker."

"I've eaten beef all my life, and now I'm as strong as an ox," said a local fellow to his girl as they were dining in a local restaurant last Sunday. "That's funny," she replied, "I've eaten fish all my life and I can't swim a stroke."

"Stuck in the mud?" asked a passing tourist of a local fellow who had started to get his car out of a mud-hole on the edge of the road. "No, my engine died here and I'm digging a grave for it," was the reply.

An editor in southern Alberta says that a lady bootlegger in his town informs her customers when she has a supply of liquor on hand by wearing white stockings when she goes to town. When she hasn't any supply on hand she wears black stockings. After all there may be some reason why men turn and look when the ladies pass on the street.

It pays to read advertising messages in this paper, week by week, they contain store news, and information of much value—offerings of bargain buys which mean money saved to the careful shopper! Incidentally, it is mighty poor economy to be without the local paper—its advertising news alone will, in the course of a year, more than repay in dollars and cents the price of the annual subscription.

Immediate Relief for INDIGESTION

WHAT most people call indigestion is usually excess acid in the stomach. Food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude herbs. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention, it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume

in acid. The results are immediate with no harmful after-effects.

Once you learn this perfect way you'll never deal in any other manner with the headaches, gas, bloating, nausea, dizziness, indigestion, biliousness, etc., due to an over-acid stomach and bowels.

Be sure to get genuine Phillips'. It is always a liquid, never made in tablet form. Look for the name Phillips on the bottle. All drug stores—50c.

PHILLIPS' MILK OF MAGNESIA

WORLD HAPPENINGS BRIEFLY TOLD

Alex. Chisholm, prospector and veteran of the "trail of '98," is dead at Smithers, B.C., at the age of 70.

Wireless telegraph service has been established between Buenos Aires and Chilean cities and with Spain.

The \$100,000,000 Canadian government bond issue floated in the New York market October 7, was heavily over-subscribed.

Assembly of the League of Nations stood in silence several moments on the occasion of the first anniversary of the death of Gustav Stresemann, German post-war foreign minister.

The eleventh assembly of the League of Nations adjourned Oct. 4, after wrestling earnestly for three and a half weeks with pressing world problems.

Reports published abroad that trouble had arisen about the British battle cruiser "Revenge," anchored in Gofu Juan harbor, Nice, France, were denied by authoritative sources.

A number of delegates attending the Canadian Automobile Association convention at Vancouver endorsed the proposed highway through British Columbia to Alaska, in addresses made at the annual banquet.

The London Times editorially said that Russian dumping of grain on European markets was "clearly due first and foremost to desperate need of the Soviet Government for credits to finance their five-year industrialization plan."

The Department of National Defence announces that Major D. R. Sargent has been promoted to the rank of lieutenant-colonel and to command the 2nd Battalion, the Scottish Regiment. The regimental headquarters are at Nanaimo, B.C.

Athletes recommend Minard's Liniment.

Had Never Seen Ocean
To have lived within 210 miles of the Atlantic Ocean for a lifetime without seeing it is an experience that comes to few in these days of automobiles. Yet fifteen of the seventeen Vermont clergymen who attended the New England rural church workers' conference near Old Orchard, Me., had never seen the sea.

Germany planted 1,800,000,000 trees in 1928.

Flaky Pie Crust

The secret of making good pie crust is: "Use Purify Flour—and keep the dough dry!" Try this recipe for 2 shells:

3 cups Purify Flour 1 cup lard
1 teaspoon salt 1 cup cold water.
METHOD: Mix the flour and salt, cutting in half the shortening until the mixture is like fine meal, gradually adding exact quantity of water but not a drop more. Use less water, if you can, and the pie crust will be even flakier.

Turn out on board very lightly sprinkled with Purify Flour, roll about 3/16 inch thick. Sprinkle balance of shortening over dough, fold over three times and roll again to required thickness. Bake as fast as oven (400°).

Said 30c for Purify Flour Cook Book.

W. N. 17, 1928

IS ELECTED PRESIDENT

Walter Ashfield, Editor of the Grenfell Sun

Weekly Newspaper Publishers Meet

Fourteenth Annual Convention of Canadian Weekly Newspaper Association, Saskatchewan Division

At their fourteenth annual convention held at the Saskatchewan Hotel, Regina, the Canadian Weekly Newspaper Association (Sask. Division), elected Walter Ashfield, Editor of the Grenfell Sun, as president for the ensuing term.

H. G. Shadrake of North Battleford, the retiring president, was chosen as honorary president; A. King, Rouleau, vice-president; S. J. Dorman, Alameda, secretary-treasurer; while the following were elected to the executive: S. N. Wynn, Yorkton; E. F. Hodgins, Vancouver; J. J. Zwick, Kerbert; J. Scott, Whitecourt; H. Berryman, Blaine Lake.

Several instructive addresses were given during the sessions. Mr. T. A. McInnis, of the Bureau of Publications, gave an interesting talk, and Hon. J. F. Bryant spoke on the subject of Saskatchewan's Resources. The members of the association were the guests of the Saskatchewan Government at a banquet on Thursday evening, Oct. 2. Following the banquet an informal dinner, sponsored by the Toronto Type Foundry Co., was greatly enjoyed. At noon on Friday, Oct. 3, the members were tendered a luncheon by the Saskatchewan Wheat Pool, and on Friday evening the Weekly Newspaper Association banquet was held at which the newly elected president presided. It was decided to hold the 1931 convention at Regina.

Good Recipes

Smoothness Of Texture In Recipes That Call For Milk and Sugar

Do you ever have difficulty in getting a smoothness of texture in recipes that call for milk and sugar? Good recipes obtain wonderful flavor and consistency through the use of Eagle Brand Sweetened Condensed Milk. The milk and sugar are thoroughly combined (almost pre-cooked you might say) so that results are obtainable that could not be expected if you mixed the sugar and milk yourself. Having the milk and sugar already blended is a great advantage.

Aside from saving sugar—and the trouble of mixing—there is the certainty of a finer flavor to the dish. The condensed milk combines quickly and easily with all other ingredients—blends them closer together—and gives the recipe a smoother texture. Another advantage of condensed milk is its convenience. One can keep several cans on hand as it keeps perfectly, so there is no such thing as running short, but rather a certainty of pure, fresh milk whenever it is required.

Saskatchewan Wheat Pool

Nomination papers for the annual election of Saskatchewan Wheat Pool delegates are being mailed out from the Head Office at Regina. Nominations will be accepted up to 6 p.m. on Tuesday, November 4. As soon as possible after the closing of nominations, ballots will be mailed out to all Wheat Pool contract-signers in the sub-districts where two or more candidates have been nominated. The closing date of the election has been set for Tuesday, December 2.

Marvelous Yield Of Oats

Alert to the possibilities of "Marvelous" oats, William White, farmer of the Albert district, southeast of Diggar, Sask., has reaped a marvelous yield. From an experiment plot of four and a third acres, he threshed 121 bushels to the acre. The oats weighed 42 pounds to the bushel. The land was new breaking on an old pasture field. Neighbors threshed the grain, measured the plot and verified the yield.

Canada has lost in eleven years, through insect pests, almost as much as she spent on war demobilization from 1915 to 1926.

A Huge Undertaking

Building Of Sydney Bridge In Australia Requires Much Skill

The central arch of Sydney Bridge in Australia has been closed and it is expected that 18 months will elapse before the bridge is open for traffic. Construction by the British firm of Dorman, Long & Co., it is the largest arch bridge in the world. The contract price was \$4,217,721, but the total cost will probably exceed \$6,000,000. There were provisions throwing on the New South Wales Government the extra cost due to rises in wages, which have been large.

In planning the bridge it had to be considered that more than half the total traffic of Sydney, the chief port in Australia, had to pass under it. The bridge had to give headroom and clearance to big ocean liners. The central arch is a single span of 1,650 feet, and there is a clear headroom for shipping of 170 feet at low water. The top of the arch is 440 feet above the water, exactly the same height as the highest point on Hampstead Heath, and 75 feet higher than St. Paul's Cathedral. With its approach, the bridge is 3,770 feet long. The total width of the deck of the bridge is 160 feet. It carries four lines of electric railway, in addition to a 57-foot roadway, and two footways. There are 37,000 tons of steel in the arch construction and 12,000 tons in the approaches or a total of 50,000.

Daily Air Service

A daily air service between Lethbridge, Calgary and Edmonton, Alberta, a distance of 320 miles, has recently been inaugurated. This new service connects the cities by air mail service from Calgary to Winnipeg.

Large steel manufacturers in Canada are operating nearly at capacity.

Gowper says "Nature is but a name for an effect whose cause is God."

Take one TONIGHT Wake up RIGHT Cascarets "THEY WORK WHILE YOU SLEEP" Quick Sure Relief FOR CONSTIPATION BILIOUSNESS SLUGGISHNESS 10c

Left Problem Unsolved

Britain's Foremost Physicians Cannot Tell What Causes Sea-sickness

"Drink whiskey." "Don't drink whiskey." "Smoke strong cigars." "Don't smoke at all." "Eat five good hearty meals a day." Restrict yourself to very light meals. "Get plenty of exercise." "Lie around and take things easy." "Eat all your meals in the dining saloon." "Take your meals on the deck if you feel seasick," and a dozen other remedies for sea-sickness were discussed by 100 of Great Britain's foremost physicians and surgeons before they sailed for home on the Canadian Pacific liner "Duchess of Richmond."

The diversity of opinions was so great that before the 20,000-ton liner sailed the medical party had divided itself into two schools of thought. One prominent Irish surgeon told interviewers that a similar discussion had taken place when they departed from England. "If that subject had been on the agenda at the British Medical Association meeting in Winnipeg, the discussion would still be going on," he said, "and not one of us could have offered a constructive suggestion."

"Sea-sickness is a mental condition," another well-known Harley Street physician opined, "if you make up your mind that you are not going to be and you won't be." Which sentiment might have got by had not a colleague chipped in with the remark: "Then you must have made up your mind to be sick on the way to Canada, Doctor." And silence descended.

By the time the last whistle blew, five minutes before the "Duchess of Richmond" cast off her hawsers, one conclusion was reached and the 100 doctors agreed as one man what their course would be if overtaken by the malady.

Collectively they agreed that the proper practice would be to call in the ship's doctor. "He knows more about it than we do."

An Unusual Voyage

Two Germans Plan To Cross Atlantic In Rubber Ball

To bounce across the Atlantic in a rubber ball is the unique project of two Germans in New York. They have written nine rubber companies giving them the opportunity of making the ball. They calculate with the help of the ocean and wind currents to make the unusual voyage to Europe in sixty days, but to be on the safe side they intend to take provisions and water for ninety days.

Plenty Of Wheat

George Kiebel, 67-year-old Illinois farmer, estimates that he has threshed enough wheat during the past 60 years to make 118,320,000 loaves of bread. His average has been 30,000 bushels a year.

Prayer Was Answered

Farmer Jim Garnett, of Coolidge, Kansas, spent most of the summer praying for rain—then it rained so hard he had to use a rowboat to harvest his Kaffir corn.

WHY FAT MEN STAY FAT

"The trouble with me, and I guess this applies to 99 out of every 100 men who are putting on weight, I didn't have the energy or 'zip' to keep it off. Lost all interest in any healthy activity and just lazed around accumulating the old pounds, until I got that 'Kruschen feeling.'"

Start taking Kruschen Salts—that's the common-sense way of reducing—but don't take them with the idea that they possess reducing qualities in themselves.

This is what they do—they clean out the impurities in your blood by keeping the bowels, kidneys and liver in splendid working shape, and fill you with vigor and tireless energy.

As a result, instead of phoning yourself in an easy chair every free moment and letting flabby fat accumulate, you feel an urge for activity that keeps you moving around doing the things you've always wanted to do and need to do to keep you in good condition.

Kruschen Salts are the up-to-date Fountain of Youth. Take one-half teaspoon in a glass of hot water to-morrow morning and every morning—be careful of the foods you eat—take regular moderate exercise—then watch the pounds slide off.

Catering To Visitors

Winnemere, England, Bans Sunday Civic Sports To Boost Scenery

To boost its scenery and also give city employees a holiday, Winnemere, England, has decided that all municipal tennis courts, putting greens and golf courses be closed on Sunday. Those in favor of sports on Sunday afternoons said that records showed that the clergymen and residents of Winnemere used to watch football being played after church on Sunday, but the city council decided that visitors should go to Winnemere for scenery and solitude.

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE
MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are curly to from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Distributors: JOHN A. CHANTLER & CO., LTD.
51 Wellington St. W. TORONTO, ONT.

CHAPTER II.—Continued.

"Do you know," he broke in, practically on this solemn reverie, "I'm almost famished. No" (as she turned a surprised face to him), "don't say it. I know it's only eleven-thirty. I know it's not time to eat, and I don't care. Thunder! Gay, I've lived all my life by rules. I hate 'em. From now on, unless you make a nice, name house-cat of me, we'll eat when we're hungry; that is," he added, grinning, "if we can arrange to be hungry at the same time!"

"Otherwise," smiled Gay, her fears vanishing before his carefree grin. "I infer that we'll eat when you're hungry."

Nick laughed, but refused to answer this awkward question. Instead he said, stopping the car: "Here's a brook and a pine tree, so near that we can easily keep an eye upon the river, though no self-respecting 'wamp' would consider stealing it. Say! you don't mind eating early, do you?"

The girl laughed at this tardy return to manners.

"What am I, to decree when I shall eat, if my lord and master?"

"Gosh!" Nick interrupted fervently. He raised awed eyes to heaven. "She calls me her lord and master! But" (with a sudden dropping to earth), "you can cut out that line of talk, Gay. It's medieval. Call me 'the boss.' If you must; but not your lord and master. I'm at home in jumpers, but I'd look a fool with an ostrich feather in my cap."

"I'm not so sure of that," Gay contradicted, regarding his clear-cut profile critically. "One of those three-cornered hats, you know, with a plume resting on your shoulder."

"Glory!" gasped Nick, staring at her. "Have you lost your mind, Gay?"

"Do Not Hesitate to Try It"

"Your Vegetable Compound is a good medicine. Anyone who is in poor health should not hesitate to try it. When I was taking the Vegetable Compound I tried the sample Liver Pills I found in the package. I have taken them every night since and I can feel myself improving. I am so thankful for the good they do me that I have told several women about it."—Mrs. G. W. Posliff, 263 Huron St., Stratford, Ontario.

Lydia E. Pinkham's Vegetable Compound

W. N. U. 1859

His eyes were raised to the window below which hung the sign. Then before she could speak, he was out of the car, giving a little brush to his clothes as if in a desire to appear well on this occasion.

"I'll just run up and see if this is right, though I believe the town clerk usually perches near a Justice in these Green's. I never got a marriage license before, Gay, and I may take time. If I'm longer than you expect, don't worry. I shan't go back on you! My dear girl, you look solemn as a funeral. Cheer up — the worst is yet to come!"

He turned away, then hesitating at the dingy doorway, came back to say: "Of course you know, Gay, that I was only trying to brace you up? There isn't going to be any 'worst' about it, either for you or me."

It seemed to Gay, waiting nervously outside, that he was a long time gone; yet when she saw him coming, she felt, with wondrous inconsistency, a sense of panic. The street was almost deserted of passers-by, but he came near and spoke softly.

"I've got the license, and the Justice is waiting for us. I —"

"Nick," broke in the girl suddenly, "couldn't we go to a minister?"

He laid a comforting hand on hers. "The afraid of this, there's been a lot of publicity lately about under-age couples getting married here. You look about fifteen, Gay, and I'm no Methuselah! The persons have been forced to shut down on these hasty weddings—that is, they won't do it without some sort of investigation. And we haven't time for that, though I hate like thunder to ask you to come up here."

"Is—is it an awful place?"

Nick smiled.

"I haven't seen it. The town clerk offered to act as witness and tell the Justice we were here. Come, dear. We mustn't keep him waiting."

Gay stepped onto the sidewalk glancing down with apprehension at her dusty shoes.

"Do I look all right?"

"You look a sight to me, Gay, and that's all that matters." Then, with a sudden understanding of her mood, he added: "You look great! I bet that town clerk will expire of envy!"

So it was with a laugh, that they started up those dingy stairs that were to lead them they knew not where. The echo of that laughter was still in their ears when Nick opened the door bearing the name of Josiah K. Miller; but it died at their first glimpse of the room beyond. It was, thought Gay, with a sense of suffocation, so much worse than she expected. The dust of the stairs and hallways seemed to penetrate their atmosphere. Josiah K. Miller, his beard stained profusely by tobacco, slouched in a chair behind a roll-top desk. The town clerk, a dapper little man wearing a red necktie, stood by the window, his eyes wide open, and cheer, the Miserere from *Il Trovatore*. Before a typewriter sat a slovenly, gum-chewing girl, who yawned widely at Gay's approach, and removing the gum stuck it on a corner of the table; while the town clerk, with a snicker that showed the whites of his eyes, remarked jocosely: "Ah, here's the bride!"

He hummed lightly a bar or two from *Lohengrin*.

Gay's hand went to her throat, as if to stifle the revolt that choked her. She couldn't be married here. She threw an appealing glance at Nick, but he was speaking to that dreadful man behind the desk. Loathing the whole scene she lowered her eyes, only to behold a tin spittoon as evidently in need of attention as was Josiah K. Miller's beard. It was too horrible!

Then something steadied her. She glanced up to meet the benign gaze of Abraham Lincoln, looking down from a steel engraving above a dirty marble mantel. She thought (and laughed of herself later), "If Lincoln can stand it, I guess I can!" Then she felt Nick's hand upon her arm, and the Justice, slouching to his feet, began to speak.

(To Be Continued)

Denmark in the Lead

While the so-called world powers are trying to make up their minds what to do about naval reduction Denmark has decided to scrap one of her two remaining cruisers and sell the other probably to China. This would come under the heading of practicing what the other fellow preaches.

All true cacti are natives of America.

Health Service By Air

Interest Taken in Possibilities of Development For Peace River District

Possibilities of developing a regular aerial health service for the Peace River country similar to that in use in rural parts of Australia, were viewed with interest by Dr. W. W. Chipman, professor emeritus of obstetrics and gynecology at McGill University, who returned from the north recently.

Interviewed, he said: "The medical people, I believe, are keeping pace with the demand for air as is practical. I would like to see more nurses in the country. Motor transportation and the aeroplane have revolutionized medical conditions and sick people now can be brought to the hospitals. There are excellent hospitals in the country."

Asked if he thought an aeroplane service carrying doctors and nurses to outlying points such as is in operation in Australia, would be practicable in the Peace River country, he replied: "I think it would be interesting possibilities and might be employed to advantage."

"I was not in any settlers' homes, but the people looked healthy and vigorous and were extremely optimistic even with the price of wheat lower than it has been for 16 years and the price of grain extremely hard. I was impressed by that."

When Men Were Men

Fest Performed in Pioneer Days Hardly Possible Now

Papers recently carried the story of an athlete who collapsed after carrying a 100-pound weight a few miles, says the *Waseca Herald*. This brings to mind a story current in Le Seur County, Dakota, in pioneer days. In the early '60s a big Irishman named Patrick Sheehan, who settled in Montgomery, accompanied a neighbor to Hastings to get flour for his family. The trip was made with the old-fashioned ox team. At Hastings one of the oxen got sick. Sheehan knew his wife and babies were out of food, so he threw a 100-pound sack of flour on his shoulder, took a package under his arm and struck out for home, making the trip of more than 90 miles in a little over 24 hours. This feat never got from page headlines in the newspapers, but we doubt if any modern athlete would attempt it today.

The Oil Of Power.—It is not claimed for Dr. Thomas' Electric Oil that it will remedy every ill, but its uses are so various that it may be looked upon as a general pain killer. It has achieved that greatness for itself and its excellence is known to all who have tested its virtues and learned by experience.

Research Is Essential

In the modern world a nation cannot expect to hold its own, unless it encourages in the fullest way fundamental, unoriented research into the arcana of Nature, and unless it is alert to take immediate advantage of every practical outcrop of such research.

It took news of the Crimean War a week to get to London, England, by messenger, as modern methods of transmitting news were not known then.

Minard's Liniment aids tired feet.

No Unemployed in Iceland

Hon. W. J. Major Found People Busy and Prosperous

Economic depression may be worldwide at the present time, but it has not reached Iceland, where unemployment is practically unknown, and business flies on wings of activity. Hon. W. J. Major, K.C., attorney-general, told the Winnipeg Rotarians at a recent luncheon in the West Grand Hotel. Mr. Major described his visit to the island democracy of the north last summer when he represented the Manitoba government at the millennial celebration of Parliamentary government.

Reykjavik, capital city of Iceland, Mr. Major said, was much like a Canadian city of similar size, with excellent schools, business houses and public buildings. In the realm of literature, both in poetry and prose, he said that Iceland had achievements of which she could be proud. Her influence for good had spread far across the earth.

Out of a population of 105,000 at the present time, not a single mentally sound adult was unable to read or write, and there were only four or five cases of unemployment at the time he visited the country.

The Major painted a pleasing word picture of Iceland, with its pleasant green fields and majestic mountains, describing how its people had wrung every possible advantage from its resources. He paid special tribute to the sterling qualities of its population.

KEEP THEM HAPPY BY KEEPING THEM WELL

It is natural for children to be happy, active and full of fun. When they drive off in a tantrum and disinclined to play you may be sure something is wrong. Almost invariably that something lies in the digestive tract.

It is to meet the need for an absolutely safe corrective of childhood ailments that Baby's Own Tablets have been designed. They gently regulate the stomach and bowels and drive out constipation and indigestion; break up colds and simple fevers and allay teething pains. Concerning them Mrs. W. E. Forsyth, Dover, N.B., writes: "I would not be without Baby's Own Tablets as I know of nothing to equal them for fretful, fussy babies who are troubled with colds or sour stomach."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from *The Dr. Williams' Medicine Co.*, Brockville, Ont.

An Interesting Discovery

First Illustrated Book Printed in England Was Found Recently

One of the heads of a firm of English booksellers has recently discovered the first illustrated book ever printed in England.

It is the *Machlinia Book of Hours*, and is stated to be worth \$100,000.

William De Machlinia was London's first printer to use wood blocks for illustrations, and this volume was issued from his second printing press near Fleet bridge in the middle of the 15th century.

Although fragments of the Book of Hours have been found from time to time in the bindings of old books, no one ever suspected it was illustrated. The volume consists of a printed vellum pages and has eight illustrations, portraying the meeting of the Virgin and Elizabeth; the holy family at Bethlehem; the presentation at the temple; the worship of the magi; the massacre of the innocents; the shepherds; the judgment; and the crucifixion.

The find is particularly interesting, because these first line drawings may be said to be the foundation from which all picture reproductions have their origin. It is thought that the book may go to America.

Douglas' Egyptian Liniment is recommended for sore necks, galls, distemper, callouses and spavins. Removes proud flesh and Hoof Rot. Stops bleeding instantly.

A Curious Coincidence

It is an interesting historical fact that although the Duchess of York is a daughter of a Scottish peer, she has a considerable amount of English blood in her veins, as her surname—Boyes—indicates, and, curiously enough, she is herself descended from the first Duke of York there ever was—Edmund of Langley, a son of King Edward III.

Perfect dyeing so easily done!

DIAMOND DYES contain the highest quality anilines money can buy! That's why they give such true, bright, new colors to dresses, drapes, lingerie.

The anilines in Diamond Dyes make them so easy to use. No spotting or streaking. Just clear, even colors, that hold through wear and washing.

Diamond Dyes never give things that re-dyed look. They are just like at all drug stores. When perfect dyeing costs no more—is so easy—why experiment with makeshifts?

Little Helps For This Week

"God is our God for ever and ever; He will be our Guide even unto death."—Psalm xlviii, 14.

Thy way, not mine, O Lord, However dark it be, Lead me by Thine own hand.

Choose out the path for me. Not mine, not mine the choice In things, or great or small. Be thou my guide, my strength, My wisdom, and my ail.

We want a guide who knows us, whether we be self-willed and overconfident, or dependent and oversensitive, or worldly and aspiring.

We want a guide who knows our frame and plies us, is not vexed with our ignorance or mistakes, but is tender towards us and patient. We want a guide who values character, and knows how to train while He guides; who guides for the purpose of training, sometimes into very hard paths, but profitable for the soul.

—Theodore Dwight Woolsey.

Radium Ore Discovery

Deposits in Ontario May Yield Sufficient to Supply the British Empire

Belief that there are deposits of radium ore near Wilberforce, in Haliburton county, Ont., capable of supplying the needs of Canada, and possibly of the whole Empire, is expressed by Dr. G. E. Richards, head of the enlarged X-ray department of Toronto General Hospital. Dr. Richards is director of a company interested in the project.

He asserted that investigations over a period of three or four years had uncovered an apparently extensive deposit which averaged 186 milligrams of radium per ton of ore treated, a higher average than in the radium-bearing ore of the Belgian Congo, at present the world's chief source of supply.

Persian Balm—the delight of dainty femininity. Imparts a fragrant charm to the complexion. Tones up the skin and makes it velvety soft in texture. Cooling, refreshing. It is delightful to use. Never leaves a vestige of stickiness. Invaluable for hands, face, and as a hair fixative. Wonderfully soothing and protective. Especially recommended in cases of roughness, chafing caused by weather conditions.

Remarkable Crops

Good Yields Of Grain Reported In Lloydminster Area

Some remarkable crops have been gathered in the Lloydminster area this year, running from 40 to 50 bushels to the acre in the case of wheat, and from 90 to 100 bushels in the case of oats. There has also been quite an active sale of farming machinery this year, one machinery agent stating that he had sold more threshing outfits this fall than during the past three seasons.

"Was Harold's wedding a swell affair?"

"Positively! They even used puffed rice!"

Her Three Children Troubled With Diarrhoea

Mrs. Lee Lapointe, Laurier, Man., writes: "My three youngest children were very bad with diarrhea. I tried all kinds of remedies, until a kind old lady told me to try Dr. Fowler's Extract of Wild Strawberry. I got a bottle right away and started giving it to them, and the next day the diarrhea had stopped altogether. Now I will know what to do when any of my children are troubled that way again."

On the market for the past 35 years put up only by The T. M. Burns Co., Ltd., Toronto, Ont.

For Winter Wear For All

Too busy getting winter stuff out this week to write an ad. But whether you want Mitts or Felts, Moccasins or Overshoes, Rubbers or Underwear, Mackinaws or Leather Coats, in fact any staple need for any of the family, we have them here for you and at Winnipeg prices. The same prices for the same terms but they are here ready for you.

Canadian Pacific Contributes to Relief of Unemployment

E. W. Beatty, Back From Inspection Trip, Voices Confidence in Canadian West Despite Depression—Crop Outlook Good—Distinguished Party Makes Comprehensive Tour.

Confidence in the ability of the Canadian West to face and overcome its problems, and a practical plan for assisting in the relief of unemployment were outstanding features of the annual inspection trip through the West just completed by E. W. Beatty, Chairman and President of the Canadian Pacific Railway Company, and a party of Directors and distinguished guests. Following upon the trip, Mr. Beatty has announced the Company's contribution to the general plans for the relief of unemployment in Canada as follows:

"After Conference with the Federal Government, an arrangement has been entered into whereby in consideration of the assumption by the Government of interest charges for a specified period on the capital expenditure involved, the company will immediately embark on certain works, which had been approved for the future but which in ordinary course would not have been approached until 1931 or 1932. In framing the programme, we have had particularly in mind the desirability of providing some relief to the agricultural industry by furnishing work for farmers and their work animals, and by carrying transportation facilities to those districts where the length of haul to the railway imposes an undue burden on the producer's time and resources. Other works on the list are designed to absorb as much as possible of the surplus labour in the towns and cities."

"The program follows: Track will be laid on the branch line now graded from Crossfield West to a distance of twenty-eight miles, and on the Lacombe and North Western Railway from Thorby to a point of junction with the Calgary and Edmonton, 22 miles. Construction will proceed on the section of the Nipawin-Prince Albert line from the end of the present grading to Henrbourg, a distance of approximately twenty miles, from Medstead to a point on the Deben-Meadow Lake line, a distance of thirty-five miles, from Consworth to Rosetown, a distance of twenty miles, and from Rosetown to a distance of twenty-five miles, and on the Kettle Valley Railway a link will be built connecting the tracks at the North and the South end of Dog Lake. Rock

ballasting will be taken in hand on an extensive scale on the Lachute subdivision, on the Galt subdivision, and on the Algoma district, all in Eastern Canada. Gravel ballasting will be done on the New Brunswick district. One hundred miles of track in Ontario will be relaid with a heavier rail section, and one hundred and fifty miles of the heaviest rail section so far used in Canada will be laid in British Columbia. The manufacture of these rails will provide much employment in Canadian steel plants, in addition to the labour involved in the actual track work. It is intended also to start at once on the task of providing more commodious station accommodation at Regina. Surveys are now being entered on some grade revision work along the Thompson River in British Columbia and provision has been made for the necessary outlay."

Discussing present conditions and future prospects in general on his return to Montreal, Mr. Beatty said: "We have come back greatly reassured as to the outlook for a steady progression of general business with, in all likelihood, a well defined upturn in volume making itself evident next year."

"Despite conditions in the world's grain markets which leave much to be desired, Western Canada continues to look to the future with confidence, and apparently has quite made up its mind that it will take much more than the present recession in business to work any permanent harm to the West, or even to retard seriously or for any length of time the development which has been going forward over the past decade."

"The crops were, on the whole, very encouraging. The total yield will be considerably above that of last year, and greater than was anticipated a month or two ago. While in some districts they were far from good, in the north and more particularly in the Peace River country they were excellent. The quality, too, is generally good, although in some districts recent rain and snow have delayed threshing and may, to some extent, have lowered the grade. The decline in wheat prices naturally has had a serious effect upon the purchasing power of the people, and a return to such pronounced prosper-

ity as we have experienced in the past depends to a large extent upon the future course of the wheat markets and that of the wheat for such other commodities as this country produces in large quantities. The outlook in this respect is not at the present time clear, but I see no reason to believe that a return to more active business conditions should not be accompanied by at least a gradual upturn in values."

"In the meantime the West is not grumbling. Farmers and business men are facing conditions as they find them with a stout courage born of an unshakable confidence in the country in which they live. There are already evidences that present conditions are bringing about readjustments that in the long run will establish agricultural industry upon a sounder basis. A much wider spread of mixed farming is one of these. If the decline in wheat prices effects this in a general way throughout the West it will not have been an unmix'd evil."

Mr. Beatty and his party visited the Peace River on the way west later passing through Banff and Lake Louise to the coast. On board the "Princess Norah" they encircled Vancouver Island and spent two days at Victoria. The return was over the Kettle Valley Railroad to Kimberley and Trail where the Sullivan mine and the Consolidated Smelters were visited. The fruit-growing industry of southern British Columbia was found to be in excellent shape. Large quantities of fruit were being shipped and the quality was reported good. From British Columbia the party returned north to Prince Albert where Mr. Beatty's special train inaugurated a daily service between Regina and that city over the new Langan-Prince Albert branch. At Nipawin the party crossed the Saskatchewan River on the new bridge and inspected the branch line work going forward there. The return was through Winnipeg direct to Montreal. Travelling with Mr. Beatty were Sir Herbert Holt, Sir James W. A. Black and R. S. McLaughlin all of whom are Canadian Pacific directors. Others in the party were Sir Arthur Currie, Maj.-Gen. the Hon. S. C. McBurn, Hon. Senator Smeaton White, Mr. Beaudry Leman and Dr. W. W. Chipman.

Main Street

Mrs. W. E. Walker is visiting with her daughter, Mrs. V. Peterson. Mr. and Mrs. Foxwell motored to Chauvin on Sunday.

Mr. Chas. McLean returned Saturday after spending a week in Edmonton.

Bob Keely spent the week end in Edmonton where his mother has been ill.

Mrs. A. Johnstone of Mentmore, Manitoba, is renewing acquaintances in the Irma district.

The Irma Ladies Aid are practicing for a play to be put on in December.

Mr. Barney Deveney, left Saturday for his home at Philadelphia, Pa., after spending a month in the Alberta district.

George King left Wednesday for his home in Regina after spending the summer with his grand parents, Mr. and Mrs. W. H. King at Irma.

Mr. A. E. Foxwell received word last week that his mother who lived at Lyn Regis, Dorset, England, had passed away.

The Irma Ladies Aid will meet at the home of Mrs. T. Shaw, Thursday afternoon, October 23rd. All ladies are invited to attend.

Owing to delay in threshing Irma Rexall One Cent Sale will be postponed to a future date. Watch for announcement.

Thursday's west bound local passenger train was delayed in Saskatchewan on account of the snowstorm and did not arrive in Irma until Friday noon.

On account of the storm that continued until time to go to press, and the train delayed, this issue of The Times is one day late in getting printed.

Clifford Smallwood is the proudest boy in the Irma District, having bagged a wild goose last week end weighing 11 1/2 lbs. and measuring 6 foot 2 inches from tip to tip of wings. Atta Boy, Cliff.

Chas. Pyle has rented the Livery Barn from G. A. Trip and intends occupying the same and furnishing accommodation to farmers and others wanting to have their horses fed and watered.

A successful Tea and Shower for the Bazaar was held at the Personage on Saturday. Quite a number of members and friends dropped in and left donations of fancy work and articles and funds for fish pond.

The date of the Bazaar has been set for Saturday, November 1st.

Mr. R. Patterson received word the first of the week of the sudden death of his brother Fred of Westlock. Mr. Patterson left Tuesday night to attend the funeral. We understand that the deceased leaves a wife and three children.

Saturday morning when McFarland went to open their store they found that the rear door had been forced and some clothing and other articles taken from the store. The police were notified and a watch is being kept for the missing articles of which a good description was given.

Mrs. W. Masson returned home on Wednesday after spending two weeks with her parents at Viking, where she went to assist with the threshing work. Unfortunately the farmers in the Viking district have had to postpone the threshing operations on account of bad weather, the same as the Irma farmers.

Mr. A. White who suffered with an accident last week while threshing on the Geo. Madder farm near Fabryan has recovered and left the Fabryan hospital Thursday. Mr. White went to remove the cap from the radiator when he was seriously scalded on the face and arms.

Mr. Cecil Askin, Mrs. L. Schroder and Mrs. C. Burke, left for their home in California, Monday after spending over two weeks with Mr. Askin's parents at Irma. Mrs. Askin accompanied them as far as Edmonton, returning to Irma Wednesday. The party had intended spending a longer time at Irma but were afraid to wait on account of the sudden change in the weather. They are motoring home via Seattle and Vancouver and intend making several stops on their way south.

Since Tuesday the Irma district with the rest of central and northern Alberta has had one of the worst snow storms that can be remembered so early in the season. Tuesday the weather turned colder with sleet and rain which toward night turned to snow. Wednesday the thermometer had dropped to 12 above zero with more snow and wind and Thursday the sun made several attempts to shine but the thermometer was still down and snow drifting in every direction. Little over ten per cent of threshing has been done and it will take a week or ten days of good warm weather before anything can be done. What grain has been threshed has turned out well, Mr. F. C. Weiss threshed 100 acres which yielded 4200 bushels and graded No. 1. Several similar reports have been made from different parts of the district.
